II. DISCUSSION

A. U.S. Patent No. 5,101,890

The '592 patent was cited as an X-type reference in a Search Report regarding a

corresponding application filed in the United Kingdom.

Based solely on the drawings and the attached English-language Abstract, the '701 reference is pertinent because it appears to disclose a heat exchanger that uses parallel extending flat tubes and corrugated ribs. It is believed that U.S. Patent No. 5,178,211 corresponds to the '701 reference.

The '701 patent reference was cited as an X-type reference in a Search Report regarding a

corresponding application filed in the United Kingdom.

III. CONCLUSION

It is believed that none of these references, alone or in combination, disclose or suggest the invention claimed. However, Applicants wish to make it clear that the disclosure of the above references is in no way an admission that they qualify as prior art. It is Applicants' desire, however, to have these references available in the record for both the Examiner and the public to see. Applicants therefore request that the Examiner review the entire disclosure of each reference and make the above-listed references of record.
